Canadian Brown Swiss and Braunvieh Board of Directors

Dave Rousseau, President, Quebec

Fermebrownheaven@gmail.com

My name is Dave Rousseau. My wife, Josée Charron, her father, Gilbert Charron, and I operate an 80-head Brown Swiss herd and we cultivate about 300 acres of land in Verchères in the Montérégie area in Quebec. I would like to introduce to you, your 2022 Board of Directors.

Stefan Gubelmann, Vice-President, Ontario

gubelman@tcc.on.ca

With my wife Rita Gubelmann, our children Katrina 18, Courtney 17 and Simon 15 and my parents Ernst and Yolanda we operate Gubelmann Brown Swiss in Walton, Ontario, Canada. We milk 70 Brown Swiss cows and have about 100 youngstock. Our goal is to breed cows that produce a lot of high component milk with good udders and legs and low SCC. "I feel that a well-bred Brown Swiss can compete with any breed out there". If you would like to talk about Brown Swiss feel free to contact me at gubelman@tcc.on.ca or Rita and Stefan Gubelmann at Gubelmann Brown Swiss on Facebook.

Ashley Vander Kooi, British Columbia

ash.vand@hotmail.com

My name is Ashley Vander Kooi, I farm with my husband Richard and our 2 girls, Alyssa (18) and Chloe (16) in Chilliwack, B.C. Our farm name is Lone Prairie Dairy. I grew up on a dairy farm in Chilliwack, B.C., moved to SK in 2006 and started Lone Prairie Dairy, in 2014 in Chilliwack, B.C. We milk 180 cows plus youngstock, 3 different breeds. Holstein (L P), Jersey (Lone Prairie) and Brown Swiss (Lone Prairie), all purebred. I was in dairy 4-H for 10 years, had Brown Swiss for a few of those project years, our girls are also involved in dairy 4H and attending WCC. I am currently the secretary for the Upper Fraser Valley Holstein club and a director on the South Fraser DHIA. Why Brown Swiss? When I was 8 years old, my dad bought our first Brown Swiss cow and "instantly fell in love with the big, floppy eared brown cow." Been a passion ever since. We have grown our Brown Swiss herd through sourcing animals and using sexed semen.

Ian Peden, Alberta

swisstraditionbv@yahoo.ca

I represent the Braunvieh Breeders of Western Canada. I, along with my wife Verena, own 190 acres and rent an additional 140 acres nearby. Our farm, "Swiss Tradition", is located in Leduc County, Alberta, 20 minutes South of the Edmonton International Airport. Verena, was born in Switzerland and it was her that convinced me to get into Braunvieh. We started out in 1984 with just two females and through the years built up a productive herd of cattle and never deviated from our goal of exclusively breeding Original Braunvieh. Every spring, we calf out an average of 30 cows, bred to many different sires through AI, before they are turned out with a bull.

Over the years, we were involved in importing new bloodlines directly from Switzerland, and were able to export our animals to the USA, Mexico, Brazil, Australia and also sold a couple of bulls to China. We have attended the Northlands Farm Fair Exhibition every year since 1997, where I also volunteered as a representative of the breed on the Beef Committee.

Both of us have committed much time to make the best with this outstanding Heritage Breed and we have never stopped enjoying these cattle for their looks and their great personalities.

Fred Mathys, Manitoba

Fmathys@live.ca

My name is Fred Mathys, As long as I can remember throughout my childhood I have always worked with Brown Swiss animals, abroad in Switzerland and since 1981 in Canada (Manitoba) The beginnings in Canada were not easy with very few means but with a lot of willpower and work my wife and I progressed quite quickly in the industry.

It was from this moment that I was able to build a herd of great quality. At the beginning of the 1990's and for about twenty years Swiss Dream was always among the 3 best herds in production in Canada.

Three years ago, after having retired for 12 years, I resumed showing Brown Swiss animals in partnership with two prominent breeders: Laurie & Donna Harp in Manitoba, and Dave and Josée Rouseau in Quebec. My new prefix with my partner Donna Harp is: Tailormade. I am passionate about the breed, enjoy helping producers with interest in Brown Swiss get started and want to see the breed continue to grow in Canada.

Shirley Dortmans, Ontario

dortholmeholsteins@gmail.com

My name is Shirley Dortmans and I am an Ontario director as well as a National Brown Swiss director. Our farm is Dortholme Holsteins and Swiss. We are located in Strathroy ON. My husband; John and I have a 60-cow herd consisting of Holsteins and Brown Swiss. I enjoy being on the board because I love to promote the Brown Swiss breed as they are great cows.

Isabelle Dupré, Quebec

isadupre@hotmail.com

Hello dear members!

My name is Isabelle Dupré and I come from Quebec. My farm is located in Saint-Germain de Grantham. My grandfather, Noé, founded Ferme Mélicska in 1960. But he always had a preference for cash cropping. My father, François, later took over the farm. Since 2015, I hold 50% of the shares with him. Today, we have 77 kg of MG and have 300 hectares under cultivation. We mainly grow grain corn, soybeans, small grains, haylage and corn silage. We acquired a milking robot in 2020. The transition has been difficult! Fortunately, our Browns Swiss helped us get good runs. We acquired our first Brown Swiss cow at an auction. We were surprised by her good temperament and her soundness. Year after year, the herd has grown to about 40 head of Brown Swiss. Our production level is high and the quality of the components is important to me. More and more I appreciate showing it truly is a form of art! The Dairy Supreme is a very interesting event that I hope to participate in. I am working to improve the genetics and quality of my herd and believe that Brown Swiss is a breed that should be in every herd! It is profitable in the long run and I love working with my browns. They keep me company while I work on the farm, always so curious! I look forward to getting to know more of the passionate members across Canada!

Thank you Canadian Brown Swiss & Braunvieh members for you continued support to the breed. If you would like to have your farm profiled in our newsletter or if you have any pictures, we can use for publications send them to BrownSwiss@holstein.ca

Message from Our President

In many parts of the country, we have gone from winter to summer seemingly overnight. As we are experiencing our first heatwave of the season, this is a good time to remember how well our Brown Swiss and Braunvieh cows tolerate hot weather, and how they maintain their productivity throughout the summer without suffering from heat stress.

Be sure to promote this quality when you talk about your animals with other producers who find that their own cows are less productive in such conditions.

For those who would like to experience the International Brown Swiss Show & Sale, it will be held during World Dairy Expo in Madison, Wisconsin, from October 1 to 5, 2022, and registration is now open.

You will have a chance to visit some of the best American herds (Hilltop Acres, Triangle Acres, Voegeli Farms), attend a variety of conferences, meet dynamic and passionate breeders from all over the world and attend one of the best Brown Swiss judging events in the world.

We are back at work and have welcomed two new National Directors, Isabelle Dupré and Ashley Vander Kooi, who will represent you well. We are continuing work to update our by-laws so as to allow the association to run more smoothly.

Among other things, we have significantly clarified the interpretation of the regulation governing the declaration of typical colour spots, so as allow for a better identification of the animals concerned without penalizing animals that have come from purebred stock for several generations.

The board of directors is also very proud to be able to provide funds to the provincial associations that made the request by submitting a report on their activities. This money will make it easier for them to finance themselves, and will help them to promote our breed and increase its popularity.

It is also important to inform anyone not yet aware of this that semen imports from Swiss Genetics have been temporarily halted. Things should go back to normal this fall if the issue is corrected. In the meantime, there are still many opportunities to acquire top sire genetics from other countries.

Have a great summer, and take advantage of the various activities organized by your provincial associations.

Dave Rousseau,
 President of the Board

News from Ontario

Greetings to all Brown Swiss Breeders across Canada. We are having a late spring in Ontario, but looking forward to summer when we can get outside and enjoy the company of friends and family safely.

Please join us for our annual picnic. It will be hosted by Thomas Rechsteiner and Family on June 25, 2022. Please see the notice included with this note.

We are also looking forward to the Hanover Brown Swiss Show on Saturday, August 13 at the Hanover & Brant Agricultural Society. We are remembering Bill Yarosh, who was instrumental to the success of our Hanover Show since it started. Also see the notice included with this note.

The Brown Swiss Show will take place at the Kincardine Fair on Saturday, September 3 this year. We have not held this show in person in several years so we look forward to everyone coming back and participating. We hope that by the time our Annual Meeting comes around that people will feel comfortable to meet in person. Best wishes to everyone for a safe and productive summer, and we hope to see you at our events.

Tracy Reid, Ontario Provincial Contact

News from Quebec

Hello everyone,

As you can see, we have decided to join forces with the Canadian Brown Swiss & Braunvieh Association for the publication of the Info-Brune newsletter. Our association will continue to inform you through the National. The purpose of this collaboration is to limit the cost of publishing our magazine.

I invite you to take part in our picnic on July 30th at Ferme Goulaise, a farm located in Saint-Bernard in the Beauce region of Quebec! There will be plenty of activities on offer, in addition to a wonderful meal! Book early with Brown Swiss Québec.

On that note, I wish you a great summer and a successful harvest.

Dave Labrie President, Brown Swiss Québec

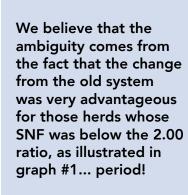

New payment method, once the transition has happened

The new market-linked component payment method has been implemented, and some of us are still finding it confusing.

As explained in the Producteur de lait du Québec's newsflash on January 17, 2020:

The P5 provinces have agreed to modernize the on-farm component payment policy to better reflect market income and to ensure greater fairness among producers, in view of the current structural surplus of solidsnon-fat (SNF) on the market. These changes do not affect what is billed to the processing plants, but rather the way the income is distributed among producers. Thus, the same amount of money will be directed to producers, but with a distribution that focuses on the individual contribution to the surplus of solids nonfat and ensures a better valuation of the components that generate returns during processing, i.e. fat and protein.

The main change in the new policy is the inclusion of an additional SNF/F ratio tier. Currently, producers with a SNF/F ratio below 2.30 are all paid the same income and those with a ratio above 2.30 receive no payment (the income is redistributed based on the fat of producers with a SNF/F ratio below 2.30). Under the new policy, two SNF/F ratios will be used to set the parameters for SNF payments.

The blue line represents the old system while the orange line represents the system that has been in effect since August 2021. They show that the lower ratios had their income in \$/kg of fat (0.54) increase significantly, while the higher ratios had their advantage slightly reduced. Under this simulation, the average price received, which was \$0.93/kg of fat for producers with a ratio of 2.2 to 2.3 versus those with a ratio of 1.9 to 2.0, will be reduced to \$0.49/kg. This is where the advantage of the new system ends.

It is true that the new milk payment policy has significantly reduced the additional income that a high SNF/F ratio provided, but it is still there. Although the price paid for solids non-fat above the 2.0 ratio has decreased compared with the old system, dropping by 40% based on the prices used in our example, that still leaves 60%. It should be noted that the price is likely to fluctuate significantly according to the mood swings of the global market on which it is aligned. This means that producers should check whether the difference obtained really covers the additional operating costs of producing the surplus solids-non-fat.

Knowing that the federation's objective is to reduce surplus protein, the maximum margin will go from 2.3 to 2.25 starting in August 2022. It's important not let thing get out of proportion, because the current system is still advantageous for Brown Swiss cattle! In short, if your herd has a natural average between 2.15 and 2.20, don't change anything!

Value according to the National average and the price of components in March 2022 for a herd producing 50 kg/d

		Nation	nal Average)		Sur	plus of	Milk re	venue

The Quebec **Brown Swiss** Club, along with the Goulet family, is proud to invite you on Saturday, July 30th, for the provincial Brown Swiss Picnic at the **Ferme Goulaise inc.** in Saint-Bernard, hosting the "50 years of history with the browns" theme.

Ferme Goulaise inc. is a family farm where the 5th, 6th and 7th generation are currently working together to run the farm.

It is a 100% Brown Swiss herd with a robotic milking system. The average production of the herd is 8022 kg at 4.6% fat and 3.5% protein. The Goulet family also operates a maple grove of 2400 taps, in addition to producing fodder and grain to meet the nutritional needs nutritional needs of the herd.

FOR THE DAY

10 a.m. Animal preparation clinic

12:00 p.m. Delicious Spare ribs lunch

1:00 p.m. Presentation of the host family and the Goulaise herd

4:00 p.m. End of day wrap up

- * Face painting and inflatable games for children
- * Ice cream available on site

RESERVE YOUR TICKETS NOW FOR THE FOR A DELICIOUS SPARE RIBS DINNER!

- \$35 (14 years and older)
- \$22 (children ages 5-13)
- \$10 for children 4 and under

Make your reservations directly with Cathy, at the office, **450-778-3753** or by email **info@brownswissquebec.com**

3022 Brown Suliss Dassion Contest

DO YOU KNOW A COW:

- That's balanced and has a positive influence in the herd;
- Who contributes to the improvement of the breed by its capacity to sire quality animals;
- ✓ Who performs well in production;
- To whom you have developed a special bond;
- **ℰ** Who has a purity of more than 93,5%;
- **♥** Who was still alive on September 1st 2021.
- ✓ Are you a member of the Quebec Brown Swiss Club?

The winner may be in your barn!

Each entrant must send their application to the Club Brown Swiss du Québec before September 1st 2022

Good quality photos taken by an amateur are permissible.

Watch for the fall magazine to note all the application deadlines and requirements.

Consult the Quebec Brown Swiss Club website for the complete rules and regulations and to fill out the entry form.

The three finalists will be chosen by a selection panel based on their pedigree, background, their progeny the trueness to breed and heart shown. You will then be invited to vote for your favorite finalist to determine the winner of the Brown Swiss Passion 2022 contest.

THE WINNER WILL BE ANNOUNCED AT
THE ANNUAL GENERAL MEETING OF THE QUEBEC BROWN SWISS CLUB

4th Edition – Fall 2022

COUPE BROWN SWISS BROWN SWISS CUP

The goal of the cup is to promote the Brown Swiss Breed to Quebec:

Take advantage of this chance to showcase the best animals of your herd in their natural environment without the added hassle and cost of a show!

The judge comes to you! The judge will go on farm to visit registered breeders to judge them in their home environment. He may take pictures to help him assessing each cow.

> Cost of registration: \$15 for the first two registrations \$10 for each additional registration der must be a member of the Quebec Brown Swiss Club The animal must be the property of the breeder

Classes

- 1st lactation
- 4th lactation • 2nd lactation
- 3rd lactation
- Breeders Choice (3 Cows)

Special mention will go to the best home bred cow and the best producer for each class.

Greetings To Everyone From Alberta

Not too many things to report this time around. Winter was long and rough with great temperature differences that were hard to live with for cattle and people alike. We would have a week or two of miserable cold down to minus 30 and 40 degrees and then have a warm snap of above zero. Not for long though and it was into the deep freeze again. It was hard to adjust. At least, we can take off, or put on, extra layers of clothes, but the animals have just the one coat no matter what. I really find it marvellous, the way they can manage. They all came through winter in good condition and gave birth to healthy and vigorous calves.

During the cold spells, the calves were born in the barn and got put under a heater until completely dry for a good start in life. We have none with frozen ears or anything. So lucky!

And now it is spring and we hope to get adequate moisture and heat. Green grass is coming up everywhere and it looks so nice. The cows are anxious to get onto pasture, but they still need lots of hay for now. We are supposed to get rain and that will help making things grow.

Talking about "growing". I have all the seed and plants ready to be put into the garden, as soon as things warm up a bit. It will be more fun than last year, when I was battling everything from deer to moles and rabbits. This year, I am prepared. All the "domes" that I had made of plastic fencing material will be installed immediately after planting to keep those critters out. This year, THEY will be the losers and I will be having the good

We hope all of you will have a great growing season. Enjoy the summer and stay safe.

Sincerely,

-Verena Peden,

Secretary Manager of the Alberta Braunvieh Association

18 www.browncow.ca 19 www.browncow.ca

After more than 20 years in Braunvieh, in 1996, we sold our second farm and for the second time moved to the city. (See first account in January, 2022 issue) This time we transferred to Kelowna, BC. All our females, almost 20 in number some with new born calves at side, sold to Texas. The Randall's of Montana bought Silverwood Dragon along with three young bulls from him. Dragon went from Randall's to Thornes, of Oklahoma, in the following years.

At this juncture, I want to express a communal thank you to "Starline Braunvieh" for being at the beginning and a major impetus for the early introduction of Original Braunvieh into Canada. Through the tough economic times of the 1970's, Florian Eberl and family with George Ulrich had a dream that seemed just beyond reality but they invested and stuck to their dream. Breeders in Canada, both east and west, the USA, Mexico and beyond, all clamored for "Starline Braunvieh" genetics. Of course, there were many at the beginning but only a few stuck with the dream along with "Starline".

For us, it was not possible to keep any live animals after the sale of our Enderby B.C. farm land except for the bull "Maranatha Benchmark". Again, we had kept the frozen genetics from a profuse collection including our own breeding program. We had had a few good bulls and females and we collected on three bulls of different genetics for future consideration. The bull calf "Maranatha Maxim", out of "Silverwood Dragon", had the highest weight gain over the winterfeeding program at Coldstream Ranch Test Station in Vernon, BC. This was an all-breeds competition, which included Charolais and Simmental. Maxim weighed 884 lbs at weaning and 1360 lbs. at one year of age. We also collected semen on him and exported some to Australia.

When we sold the farm, we traded another of our bulls "Maranatha Atlas" to a breeder, Gerhard Gross, near Peace River, AB for a bull from Mel Foote ("Melede") at Fort Macleod, AB. This was "Melede G-H Darcy 3A".

Darcy was the only known offspring in Canada left from the German import bull "Grober" and we found out some years later that some German buyers had wanted some semen. Mr. Gross, the breeder at Blue Sky AB, said he was told by a prominent and knowledgeable Braunvieh breeder that "Atlas" produced some of the best females seen.

During the first 22 years of our experience, we did not have many occasions to show our animals at stock competitions because of distance and work responsibilities. We had a market of a limited extent as we were 300 miles from the Alberta scene. We had developed and collected some genetic phenotypes of our own making and had a lot of the original imported genetics. I did short term fill-in work in the medical field, largely in Kelowna, for the 3 years from 1993 to 1996. Lori did coverage in a variety of ICU's and Emergency departments in the BC Interior. We started to look for an adequate land base in Southern Alberta. Lori found just what we were looking for as she was doing ICU/ emergency coverage in Penticton, Vernon and Fernie in BC and the Crownsest Pass in Alberta

Our next project would be to continue to collect as much historical and developing Canadian "Original Braunvieh" genetics as possible.

Our last farm purchase occurred in 1996 when we bought 400 acres on the eastern slope of the Canadian Rockies in full face of the notorious Chinook winds of the Crowsnest

Pass. Before leaving the Okanagan, however, we travelled again to Ladner, BC because we had heard of a herd dispersal that was Original Braunvieh. The breeder, Lee Lockwood, had a terminal illness and was selling all his herd that he had purchased from Alberta. To our delight there were two cows from "Starline" and one from "Melede" that were bred to an XC Bar (Copithorne) bull and a number of offspring included. Our genetics collection was significantly boosted. While in Enderby we had purchased a unique bull, "North Star Aristocrat", out of a cow "Rita" (imported) that "Starline" may have imported along with "Nelson". An "Aristocrat" son, "Maranatha Benchmark", became the originator of our foundation herd at Cowley, AB. He produced more European dairy-style cows but they were the Original Braunvieh that we wanted to start our new project with.

There were, in Alberta in 1997, only a few breeders of Original Braunvieh left. During the previous 23 years we collected some of the genetics of our dear friends Florian/Luisa, Andrew and George of "Starline Braunvieh". "Northridge Braunvieh" of George and Verna Koskewich had been breeders from the beginning and were most likely to retire first. And so over the next 3 years we bought "Northridge Freeman "and "Northridge Hereld". These were bulls that carried genetics that would likely be lost. Unfortunately, when Verna had her herd dispersal, I was practising in Calgary, and was not able to attend the sale.

In 1991 we had gone to a cattle show in Queretaro, Mexico with the "Starline" family and Pedens. Ian and Verena Peden were avid Alberta breeders since the 1980's. At the big Mexican show, we renewed acquaintances with Vicente Oti, the buyer of "Bouncer 3G", and Jose Luis Alvarez, who had purchased "Maranatha Arthur 4Y". Pedens of "Swiss Tradition Braunvieh" had developed a good name and an excellent herd of Original Braunvieh. Pedens were using some more recently imported genetics. We purchased "Swiss Tradition Mickey", "Swiss Tradition Barn Boss", "Swiss Tradition Leroy", "Swiss Tradition Rivero", and "Swiss Tradition Alergro" over the years after 1999. These were all excellent bulls with little or no common genetics.

The Canadian influence on the significant American Braunvieh breed has been largely not recognised. In the Thorne's Second Annual Production Sale glossy magazine in 1998, over 60% of the individuals or embryos for sale were from; "Starline/North Star", "Swiss-Way" (Ted Kostenuke), "Northridge", "Melede", "Silverwood", "Kerholm" or "Maranatha". We have collected on all those sources. Ted Kostenuke, owner of Swiss-Way Braunvieh, had been breeding Original Braunvieh from nearly the beginning. A lot of the early Canadian Braunvieh had "Swiss-Way" individuals. A lot of our foundation cows have had good "Swiss-Way" heritage. Ted died unexpectedly and his stored genetics became unavailable until recently when his son released some. The semen that we bought was from "Northridge" and added some unique import genetics to our collection.

The only genetics from a prominent Original Braunvieh breeder that we didn't have in our herd was "Fieldstone Braunvieh", owned by Calvin Raessler. We purchased "Fieldstone Betty 39B" with a special imported gene profile and who was bred to "Swiss Tradition Zorro". "Zorro "was out of the much loved cow of Pedens called "Dolly" that won so many ribbons over a number of years at the "Edmonton FarmFair". Calvin has since dispersed his carefully selected herd.

The first years of the 21st century was both memorable and tragic. The most memorable was the morning of May 20, 2003 when I was on the phone with a buyer in Mexico. I had not had a chance to turn off the CBC news and was talking to the Mexican when I heard from the background radio that there had been the first BSE case discovered in one cow in Alberta. I quickly interjected our conversation with, "I think there is something critical happening and I will phone you back tomorrow". The border was closed for Canadian cattle that afternoon. And the Mexican peso tanked. We, along with all the other breeders, were dealt a permanent blow. Our personal export market was dead and it never recovered. But we did move on. We carried on our gene collection program.

In the early 1990's we had occasion to send "Maranatha Maxim" semen to Australia.

20 www.browncow.ca 21 www.browncow.ca

The Badger family were the importers of "Maxim" semen. We exported, with some complexity in the mid 2000's, some "Maxim" semen and some non-registerable Original Braunvieh embryos to Colombia, SA.

The final outcome from that exportation has yet to be fully evidenced.

In December 2021, we received news from another Australia breeder of a newly born Original Braunvieh bull from an embryo of "Maranatha Beth ANN1B" collected around 1990 during the last of our Enderby years.

And so, it is almost fifty years since the beginning in 1973. We are still breeding and selling Original Braunvieh. We sold a number of females to a variety of breeders in Alberta and BC in the memorable year of 2020. Our last big trip in July of 2020 was a 2500 km/36 hour return round trip to La Crete AB close to the northern Alberta-NWT border to deliver a bull. We are trusting that we can transfer our present living collection of genetics to committed Original Braunvieh breeders. We hope to send newly born "AI"-sourced calves to Colorado this year.

We have been blessed to have had a "good life all in all" on the farm. Our sons, Robert and Michael, live close enough that they come to help on the farm whenever needed. We could not have done all of this without them. Our "daughters" Elizabeth and Andrea bring the

grandkids as well and pitch in when it comes time to give vaccinations and the like. Robert and Elizabeth's daughters Marin (16) and Linnea (13) live a short drive away in the Crowsnest Pass. Our grandson Arlo, age 5 and granddaughter Lark, age 3 (Michael and Andrea's kids) live in Calgary. We thank God for the many blessings He has given us over the years, the greatest of which, as all of you probably agree, is our family.

Do not forget the ancient Original Brown Cow. A study out of the Italian Alps published in October, 2020 suggests that the Original Dual-purpose Braunvieh may have the best genetic profile for cheese production compared to other European dairy breeds. This scientific paper summarizes that the original genetics and long-term survival of this rigorous high Alpine cow and environmentally tolerant breed is threatened.

Just this year we have been encouraged to discuss the future with new breeders from the next generation that are excited to carry on the propagation of Original European Braunvieh available in Canada. Our experience and understanding is that Canada has the world's best and most available historic "Original Braunvieh" genetic diversity. We look forward to hearing and reading about more Braunvieh accounts in the future.

CRIKSIDE

Farm, Family and Love of the Brown Swiss Cow...

Crikside farm began in 1957 when Morris and Audrey Grier purchased a homestead farm from the Guy Post family. The farm is bordered by the Jordan Creek or (crik) as farming by a creek usually meant there were springs to tap into for water. So, the farm name became Crikside. Morris and Audrey bought 3 purebred Brown Swiss in 1961 from a small farm in Minnesota to start their herd.

At that time, they had a cream quota, and I can remember setting the cream can down a cold water well with a rope to cool it until the cream truck came to pick it up and take it to the local creamery about 15 miles away.

In 1968 a new free stall barn was built, one of the first in the area,

it had a 4-stall surge parlour. My parents loved the Brown Swiss breed and enjoyed showing their cattle at local fairs. In the late 70s and early 80s Morris made a yearly trip to the Toronto Royal, it was his holiday for the year. He was very proud to win Grand Champion with Crikside Twinkle, and the award could be seen swinging from the rafters later on - a sign of his pride.

After the passing of my parents the farm is now run by myself, Candace Grier and husband Louis Guimond. We have 3 kids and one granddaughter who help on the farm. We presently milk about 55 cows. A 20 stall addition was added to the free stall in 2001, and a new Delaval 6 stall parlour was added in 2010.

We farm about 800 acres growing our own forages for feed. The cows are pasture grazing from May to October, supplemented in the barn with dairy ration and hay or round bale silage. It is a high forage diet about 75% forage and 25% concentrate. Our production average is 7439 kg, 4% fat and 3.6%protein. We breed for type and feed for production.

We are currently experimenting with cover crops to try to improve soil health and forage quality. Our future vision is to pass the farm on to the next generation, and continue to breed strong functional, good looking Brown Swiss. We love our Swiss!

www.browncow.ca 25 www.browncow.ca

HISTORY

My grandfather Jean-Marie judiciously acquired this farm in the early 30's, for the quality of the land and its proximity to the city, and it has kept growing ever since. Later on, my father Michel bought neighbouring land, increased the size of the Holstein herd and improved the facilities, drainage, silos, machinery etc.

As kids, my brother and I helped with chores. Our respective abilities were already becoming clear: Francis was good with the machinery and I was good with the animals. We already loved the job, which led us both to study at the ITA (Agri-food Technology Institute) in St-Hyacinthe. My brother took the farm management and operations course to prepare for taking over "Ferme Leclerc et fils", which had been earmarked for him at birth. I opted for zootechnology, with the intention of working as a milk recorder at the PATLQ, because I enjoyed the monthly meetings during which the herd was analyzed from all angles. In the end, I stayed on the farm, because I quickly realised that I loved breeding and herd management.

To bring us into the business, my father incorporated the farm in 1991, making the three of us shareholders of Ferme M.C.F. Leclerc inc. A smooth and simple transfer.

BREEDING

26

It was in 2005 that I got my first Brown Swiss cows. At the time, I was boarding a few animals from an excellent herd that had been dispersed. I fell in love with these beautiful girls with their large ears and calm temperament. So why not buy a few just for the fun of it...

There are some things you just can't predict... Pure chance brought me an exceptional foundation cow that became the basis of almost 50% of the current herd. Milec Zeus Beauty, EX90 4E, gave us 8 daughters, of which 7 are active in the herd: 3EX, 3 VG, 2GP.

The more I work with this breed, the more I am convinced of its qualities and profitability. These cows age well, have high and well-balanced components, calving ease and good legs. I did a lot of embryo transfers, for my own breeding program and some for sale. My Holsteins became the recipients. In the space of ten years, the herd became almost 100% Brown Swiss.

Of all the professional decisions I have made over the years, the switch to Brown Swiss was the best. By working very hard with the best animals, I made the herd what it is today, and that is my greatest pride. Strong, productive cows that get good scores. This is not a goal but the result of good breeding and good performance.

A major expansion took place in 2017 (to integrate a new generation that ultimately was not interested in the farm). This expansion took us out of our comfort zone, caused us some headaches and forced us to bring some new Holsteins into the herd (for convenience and availability). In the end, these new acquisitions help me keep a critical eye on the strengths and weaknesses of each breed. For my remaining time, I think I will keep the current ratio of 80% Brown Swiss and 20% Holstein.

SHOWS AND INVOLVEMENT

I was involved in shows for a few years. I had the invaluable help of young French interns who were

very passionate about our work. We achieved our best ever results. I have happy memories and I made good friends. I'm no longer much involved in shows because of the expense and because I don't have the time to prepare properly. I'm always open to selling beautiful animals that will delight their new owners and put the Milec name on the map beyond my aspirations.

Additionally, I've always been involved in organisations connected to breeding. I enjoy the teamwork and the chance for breeders to have interesting discussions. I started by joining my regional Holstein Club, then I moved on to the Mauricie CAB (livestock improvement circle) for over 20 years. I'm still there ...and am currently the president. The CAB led me to the organizing committee of the Symposium laitier de la Mauricie, where I spent countless years! I love organizing events that bring people together around a common goal. My most important and meaningful involvement has been with the Brown Swiss Club of Quebec, for the maximum 12 years allowed, including 7 years as president. I am still the breed delegate to the CQRL. I did a short stint on a Canadian board, but the language barrier made me turn back.

TODAY AND TOMORROW

The farm is not yet at full capacity. We have 80 milking cows, for a total of 160 head, and 98 kg of quota. We have 380 acres of land, with 320 under cultivation. Our goal is to have 90 milking cows and

over 110 kg of quota. Our average production last year was 9,037 kg at 4.3%G, 3.6%P, with an average BCA of 238-256-243. This is the lowest average of the last ten years due to problems... (but we've fixed them! Things will pick up again!). Our classification is 4EX, 21VG, 42GP, 6G.

Three of us work full time, my brother, myself and a Guatemalan worker, and a few youngsters fill in when people are on holiday. We have a tie stall barn and we still milk twice a day. We feed TMR, and calves are fed with an automatic feeder.

Francis runs a snow removal company as a sideline and is having a great time on our new woodlot. I am the co-owner of "La maison des Leclerc", a holiday residence. This is my grandfather's old house, rich in stories and culture, in which his brother Félix wrote his first lyrics. The house brings plenty of tourists to the farm, in search of immersion in our wonderful profession and keen to see how a real farm works. My father is enjoying an active retirement, making daily rounds in the barn and doing a little maintenance work. And racking up the miles on his Spyder!

I dream of one day seeing a Milec bull on a list at my favourite AI centre... I'm sure it will be a descendant of Beauty.

As for the future, who knows?

www.browncow.ca 27 www.browncow.ca

My husband Marcus and I are the third generation, now milking registered Brown Swiss in a 48-stall barn. We run the farm with his parents Armin and Antje. On April 22, 2022 we opened our barn doors to friends and neighbors to show off our tie stall milking robot.

Our lives were at a crossroads when the decision was made in July 2020 to buy the Robomax robot which features the Merlin M2 milking arm. We had our daughter in December 2019, Marcus's parents were wanting to take a step back from milking and we preferred not to hire employees.

Installing the Robomax was our best option. The expense of renovation or a new construction made moving to a free stall operation prohibitive. Fortunately, Marcus was keen and well able to learn the management and maintenance of our new robot. The decision to buy was unanimous amongst all of us.

The Robomax is manufactured by Milkomax. Ours was the 6th produced, with the others in Ontario, Quebec and Japan. The pandemic added to the challenges we and the company faced during installation and set up on our farm. After two years the operation is running smoothly. We are able to milk 3x now and have held our IBC below 10 and moved our SCC from 120,000 to 85,000.

28

It was with great pleasure that Marcus, Armin and Antje and I were able to invite our friends and fellow farmers from Manitoba to our open house. We had planned to host our guests from 2pm until 5pm but the party went to 1am with some going home to do chores and returning to continue the party!

Milkomax provided a generous selection of child and adult beverages. Antje baked a lovely selection of dainties. Our local DeLaval dealer bought pizzas for the late-night crowd. No one went without!

We are grateful we were able to host such a successful event thanks to all who supported us and attended our gathering! Paige Dueck, Four Oak Farms.

Optimizing Herd Structure for Better Profitability

The concern around short productive lifespan is not new in the dairy industry. With the feed costs sky rocketing while the increase in milk price just overcame a small portion of the increased costs, the margins became even tighter. The only solution to keep the financial health of the dairy operation is to fine-tune every single aspect to make sure your farm is profitable and sustainable. No matter where in the country or the production system, a profitable bottom line is highly linked to the average production and the longevity of the cows.

The thinking process is somewhat simple: feed costs are the highest expenditure in any herd, meaning the investment to raise heifers is higher than ever. Therefore, these heifers must work harder or longer to return the capital you invested in raising her. Taking into account the average productive lifespan in Canada around 2.4 lactations and that the average cow takes almost 2 lactations to pay back her raising cost, the "profit window" is very short for the average cow.

The main reason for culling in Canada is reproduction (graph below), although we know that the decision of shipping a cow out is rarely due to a single reason. In addition, fertility is heavily affected by several different factors, such as diseases, heat stress, nutritional problems, and genetics. The same can be said about feet and legs problems and mastitis. Also, these issues can drastically affect production long-term, so all the five major culling reasons are linked together. That way, it is impossible to point out one single aspect that shortens the cows' productive life; a very comprehensive approach is necessary to identify the bottlenecks and tackle these issues

Reason for Culling (dairy sale excluded) in Canada - 2020

Genetic opportunity, maturity costs, and depreciation

The genetic opportunity cost is how much you "miss" by keeping a cow longer instead of replacing her with a heifer of higher genetic merit. The breed improves year over year, so you make genetic gain by selecting bulls and dams that transmit higher production and longevity. This is not easy to measure at the herd level, but the average yearly gains we see in the Brown Swiss breed (about 35kg of milk and 3.5kg of components per year) can be used as a benchmark. In practical terms, each year the heifers born generate more profit than their dams and so on.

The maturity cost works the other way around: it is how much you "miss" by having a first lactation cow instead of a mature one. First lactation cows produce around 20% less than the fully mature ones (3rd to 4th lactation). In the end, this is 20% less income over a year and a lower return over the feed cost overall. Therefore, a very young herd is not as desirable as a more mature one because you could fill the same amount of quota with fewer animals.

The depreciation cost, or replacement cost, is the trade-off between genetic gain and longevity. Similar to buying a new machine, an investment is made to raise a heifer that will calve and start to generate income (from milk). At some point, you "trade" the cow in to invest in a new one; that is when you sell her, get back some income, and replace her with another one. The depreciation cost is the difference between the raising and selling prices, which can be diluted over the productive lifetime of that cow.

Thinking about a tractor, anyone would invest an extra \$5,000 on one that lasts three extra years because the higher cost is almost irrelevant compared to how much more money it is going to bring. And the logic works for cows too! Just keep in mind that at some point that tractor will be old enough that it is more advantageous to buy a new model that is more economical and efficient. This is valid for cows too – the key is balancing out genetic gain and longevity.

Ideal longevity and right-sizing your inventory

Striving for longer-lasting cows is a goal around the industry, but is there a goal point? This varies herd by herd, but an average between four to five lactations seems to be economically ideal, according to a study published in 2020.

This translates into a culling rate below 25%, considerably lower than the national average of 32.5%. That way, you optimize average production (more mature cows) while still making good genetic progress. The tables below show what the herd structure would look like. The other benefit is the drastic reduction in the replacements required.

For a 100-cow herd, moving the herd turnover from 30% to 25% means around 5 fewer heifers to keep every year, which can save you over \$15,000 per year.

Lactation Number	Percentage of the cows
1st	26%
2nd	22%
3rd	18%
4th	15%
5th +	25%

Example of herd structure distribution by lactation, for a herd with 25% turnover.

	Replacement Rate									
		22% 25% 30%								
	22	24	28	33						
Age at	23	26	29	35						
1st calving (months)	24	27	30	37						
	25	28	32	38						

Number of heifers required each year according to re-placement rate and age at 1st calving on a 100-cow herd (10% extra heifers for safety and 5% calf mortality)

Talking about replacements, this is where the herds can easily see the economic impact. Historically, there was a good market for fresh heifers, but the market has been volatile and unstable over the last years. That resulted in many older cows being sold to make room for a fresh heifer just to avoid economic loss on the raised heifers. Looking forward, keeping tight control of your heifer inventory can boost your financial returns.

It is also a good idea to calve them early, as long as they are developed enough. That way you can reduce the amount of heifers and the cost to raise them.

Ways to improve longevity and profitability

Striving for cows that have high production and lactation persistency allows you to give more chances for them to become pregnant before deciding it is not economically worth it to try again. Some high-producing herds with a high 21-day pregnancy rate are even delaying the first breeding because they know their cows hold high amounts of milk for long time.

Along with that, it is crucial to make sure the udders, feet, and legs are well built to sustain high production for several lactations while the cow is still functional and mobile.

We know that some conformation traits have a strong relationship with longevity. Finally, special attention around parturition: most of the outcomes of the following lactation are drastically affected by the conditions and events just before and after parturition.

Together, these strategies should help you reduce expenses while boosting income through higher production and longer-lasting cows.

Message from Registrar 2022

Hello Canadian Brown Swiss and Braunvieh breeders,

The year is off to a good start. Congratulations on another successful Annual General Meeting (AGM) this past March! I was disappointed not to be able to be there as I had eye surgery in early March, but was able to get caught up on everything when I came back at the beginning of April.

At the AGM, a number of by-law changes were approved. We will be sending the final copy with the by-law changes to the Animal Pedigree Act, Agriculture and Agri-Food Canada.

I would like to thank the committee and the board for their hard work on this and the membership for their support of these updates. It is great to see the motivation in the Brown Swiss membership to keep things modern and updated even if it

means tediously going through the by-laws-- probably one of the lesser-favored tasks!

The association has some exciting new plans for the coming year and one that I am involved in will be the production of a National calendar. In previous years, the Quebec Club produced a calendar for the Quebec breeders (see page 24). Next year, we will work together to create a National calendar for which all of our Canadian breeders can contribute. So, keep your eyes open for a good camera moment! We would like to receive your best photos to promote your herd in the calendar. Please see page xx of this magazine for details.

Congratulations also to our 4-H All Canadian contest winners. After not having an All-Canadian contest this year, it was nice to bring it back again this year. And we will be continuing this year! While you

are capturing those photos for our 2023 calendar, do not forget about our next All-Canadian contest as well. This year, we will have our regular contest back again as well as the 4-H contest.

An update from the registrar wouldn't be complete without some statistics so here are some numbers for you for registration and classification. For the first

quarter of the year, we have

number of embryo calves.

registered 342 animals including a

The chart below gives some interesting classification information for data collected to the end of April. Please note that all averages have been rounded to the nearest tenth of a decimal place. One thing I would like to highlight is that the average final score when you include all lactations is 83.3 That means the average of the population scored since January is 83.3 Keep up the good work!

Lactation Number	Final Score	Rump	Mammary	Feet and Legs	Dairy Strength	Number of Classifications
1	81.4	81.2	81.4	82.6	82.5	189
2	84.8	83.5	85	85.5	85.3	51
3	87.2	86.4	87.3	89.2	87.1	30
4	87.9	85.4	88.3	89.2	88.8	13
5	90.3	83.3	92.7	90.2	907	6
6	91.4	90.1	91.42	92.4	92.1	7
7	91	91	91	90	93	1
9	91	90	90	95	91	1
ALL	83.3	82.6	83.4	84.5	84.1	298

Since January of this year, we also have nine new members in four provinces. I would like to extend a welcome to those members and wish you much success in your endeavors with the Brown Swiss breed. In a small breed, that's a lot of new members, which is good considering we are only 1/3 of the way through the year. Let's see if we can get the same number in the next 2/3 of the year.

As many of you know, I am also working part-time at a farm (not Brown Swiss unfortunately). Throughout the summer, I will be in the office two days per week.

You can reach me at: Phone: 855-756-8300 ext. 283 Email: jeygenraam@holstein.ca.

If you call on a day that I am not in the office, you can either leave me a message and I will call back as soon as I'm in next. Or if you need something a little more urgently, you can talk to Chris Grice as well ext. 257.

Looking forward to seeing how much the Brown Swiss breed will grow this year!

Have a great summer!

2022

October 1-5, 2022 In conjunction with

Conference Schedule

Saturday, October 1

Cozy Nook Farm Tour, Waukesha, WI Triangle Acres Farm Tour, Freeport, IL Welcome Reception - The Jimmy's Band, Voegeli Farms, Monticello, WI

Sunday, October 2

Hilltop Acres Farm Tour, Calmar, IA Reception, Monona Terrace, Madison, WI

Monday, October 3

Conference Sessions, Monona Terrace, Madison, WI Closing Gala, Monona Terrace, Madison, WI

Tuesday, October 4

World Federation Meeting, Monona Terrace, Madison, WI International Brown Swiss Heifer Show, World Dairy Expo

Wednesday, October 5

International Brown Swiss Cow Show, World Dairy Expo World Premier Sale, WDE, Madison, WI

INFORMATIVE

The World Conference will feature US and international speakers giving presentations on timely industry and breed topics highlighting the importance of the Brown Swiss breed in the world dairy population.

FOR YOUR VIEWING PLEASURE

See some of the best US Brown Swiss genetics live and in person. Both before and after the Conference, there will be area breeder-farm tour options in addition to the renowned International Brown Swiss Show.

See you in Madison in 2022!

For more information, visit www.brownswissusa.com or https://brownswissusa.wixsite.com/wbsconference2022

DairyTrace – Common Questions

DairyTrace is the national dairy cattle traceability program administered by Lactanet Canada. DairyTrace provides protection, prosperity and peace of mind to the Canadian dairy industry and its customers in the event of emergency management.

As a dairy farmer, what are the timelines to report events when they occur on farm?

To summarize, as per proAction requirements, dairy farmers must **report within seven (7) days** of the event occurring on their premises the following events:

Event Type		Time
Tagging	Cross reference (previous tag number is known)	7 days
Tagging	Replacement (previous tag number is not known)	7 days
Movement	Move-in	7 days
Movement	Import	7 days
Movement	Move-out (currently optional but recommended)	7 days
Tag Retirement	On-farm disposal	7 days
Tag Retirement	Export	7 days
Dairy farmers must	report within 45 days of the event occurring on their premises the fo	ollowing event:
Tagging	Tag activation / Birth	45 days
Tag activation/hirth	must be reported sooner if the animal leaves the premises before 45	days of age. Event type ren

Tag activation/birth must be reported sooner if the animal leaves the premises before 45 days of age. Event type reporting applies to both female and male animals.

For any questions on event reporting contact customer service to assist you.
