Canadian Brown Swiss And Braunvieh Association Annual General Meeting

The 141st Canadian Brown Swiss and Braunvieh Association Annual General Meeting (AGM) was held on Friday January 26, 2024. The meeting was in person in Calgary with a virtual Teams option available for those who were unable to attend. It was great to have a full meeting table in Calgary and with those on line there were 21 members present.

Dave Rousseau, President, presided as the Chair of the meeting and all present were welcomed.

Business Highlights of the AGM

A review of the Financial Statement was given from the Compilation Engagement Report provided by RLB Chartered Professional Accountants. The Association had a higher surplus at the end of 2023 than 2022 and this was mainly due to the increase in registration activity.

One proposed by-law was presented – BRAUNVIEH RULES OF ELIGIGILITY – adding that all Original Purebred Braunvieh females be tested prior to registration of progeny. Reasoning for this addition to the by-law is to preserve the Original Braunvieh genetics.

The proposed by-law will be sent to the Minister of Agriculture and Agri-Food Canada for approval and once approved will be updated in the Associations by-laws and implemented.

Also, one Resolution was presented proposing Brown Swiss and Braunvieh Canada introduce a computerized "Star Brood Cow" award. Both by-law and resolution were passed by member vote.

The resolution was reviewed by the Brown Swiss Breed Improvement Committee, and will be incorporated into the criteria for calculating the award, planned to be introduced at the end of 2024. A Star Brood Award was available in the past by application and now it will be generated automatically by computerized calculation.

The 2023 Annual Report, proposed By- Law and Resolution is on the web - http://www.browncow.ca under Information and Awards / News and Events / News 2024.

During the AGM the 2023 awards were presented for the 2023 Class Leaders, All Time Class Leaders, Top Composite BCA Cow, 2022 Top BCA Herds 25 and over, Top BCA Herds under 25 cows and the 2023 Brown Swiss 4-H All-Canadian. All awards listings can be seen on http://www.browncow.ca under Information and Awards / Show & Production Results 2023. Congratulations to all the animals and breeder recipients of these awards.

Following the formal business Chair Dave Rousseau opened the floor for questions, comments or other business. During this time, it was brought forth that with the number of memberships decreasing; the Board of Directors should review the by-law related Officers. There was also discussion on the number of Officers and that they must reflect our by-laws based on the demographic requirements and membership stipulations.

As a follow-up to these discussions the Board of Directors have set up an Amendments Committee to review the by-law section on Officers and Committees. They would like to invite interested members to participate on this committee. Your experience, ideas and feedback are invaluable and if you are interested in participating on this committee, please let us know.

This committees primary mandate this year will be to review the by-law section – Officers and Committees and make recommendations to the Board of Directors.

If you are interested please submit your name by July 30th to:

Thank You

Special recognition to the Alberta Braunvieh Association – Dana Vos, Ian and Verena Peden for all their hard work in putting together and hosting the 2024 AGM. Thanks, for the sponsorship from Semex towards the costs of the AGM and to all those who donated items for the fun auction.

Following is a report from Dana Vos organizing chair for the in-person Canadian Brown Swiss and Braunvieh Association 2024 AGM and banquet.

Canadian Brown Swiss and Braunvieh Association 2023 AGM Report

On January 26, the AGM was held at The Clique Hotel close to the Calgary International Airport. It was well attended in person and it was a success. It was our first-time meeting in person since Covid and there were many members and spouses as well as family that attended. Sorry to those who were unable to attend, and thank you for those who were online.

The business meeting was chaired by our President Dave Rousseau and Linda Markle was in Calgary and coordinated the communication with in person and online members. Thank you!

The supper was absolutely delicious and anyone who was unable to come, you missed out! There was something for everyone.

I also would like to send a thank you to Semex Canada for their monetary donation to our Annual General Meeting. It means a lot to have their support for The Canadian Brown Swiss and Braunvieh Association.

Everyone expressed how wonderfully nice it was to meet in person for the

meeting as well as visiting in between the meeting, supper, and afterwards at Tonic Restaurant and Bar. My children along with Grandma really enjoyed the hot tubs on the roof, especially with the snow around. If you ever need a hotel in Calgary, The Clique Hotel would be happy to give a preferred rate to any guest with the Canadian Brown Swiss and Braunvieh Association (Contact: Guest Services Marketing and Events: Manni). The Clique Hotel also donated a one night's stay at the hotel in the silent auction, it was very much appreciated.

The Silent Auction was a huge success! Thank you to everyone who donated and also to everyone who bid on the items. Thank you to the successful bidders and especially to everyone from out East! I am very thankful to Mira Schambers, Riley, Bobbie and Harlie Jans for helping organize and take silent auction bids from those who were unable to attend. You kiddos were amazing helpers at all events and again you rocked it! It is great to have youth involved and if we have another AGM in Western Canada, I know I would like to have a component of it for the youth in Brown Swiss and Braunvieh.

They are our future and I recognize the importance for encouragement within. Thank you to Ian and Verena Peden for supporting me in organizing and logistics. A big thank you to all the other volunteers and especially to everyone who attended. For those who were unable to attend, we hope to see you at a meeting in the future. I know the commitment it takes to attend and be away from the farm, both in dairy and beef operations.

Lastly, I would like to thank my dear husband Bryce Jans, who always supports me and goes above and beyond to allow me to do the things I love. Thank you to my son, Taylor and my daughter, Jordan who also stayed to help with the farm and ranch while we were away.

I look forward to the next AGM!

- Dana Vos

Message From Our President

The year 2023 gave us the opportunity to attend our Annual General Meeting in person again, in the picturesque setting of Calgary. I would like to extend my thanks to all those who came out to make this event a success, but especially to Dana Vos for the time and dedication she devoted to organizing this wonderful day. Dinner was delectable, and the evening ended with a most original silent auction.

Our Genetic Improvement Committee has been very active over the last few months, reviewing regulations related to weight calculations for the Master Breeder award. At the same time, we implemented the Star Brood Cow award, so by the end of next year, eligible cows will receive their Star Brood Cow certificates. We are very proud of the addition of this award, as it gives great visibility to the animals of our Canadian breeders.

We have also been working hard on the classification grid to reduce the impact of Stature on the final score, placing greater emphasis on Rib Openness and Chest Width to obtain a more balanced animal capable of producing more milk while improving longevity. In addition, we adjusted the measurements for Pin Bone Width and decided to standardize them according to those used in the European classification system. These changes should be implemented towards the end of April 2024 and will enable Classifiers to better score our animals, which are less wide in this part of the body than the Holstein breed. We look forward to seeing how these adjustments evolve.

Despite the absence of a National Brown Swiss Show in Canada, we are pleased to see how enthusiastic young people in the 4-H Program are about showing Brown cows at the Classic. Congratulations to the 2023 All-Canadian 4-H winners! We also had the chance to admire the excellent performance of some Canadian breeders at the Hamburg, NY Spring Show at the end of March 2024. Congratulations to all!

Finally, as you will see in the magazine, we would like to open up positions on some of our Association's Committees to breeders wishing to join us. There will be a lot of work to do on the by-laws over the next few months to address the issue of provincial representation that was raised at our last AGM. We are delighted to see a growing number of breeders wanting to get involved in our Association.

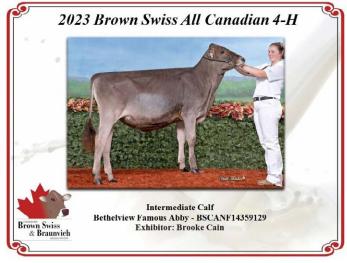

Dave Rousseau, President

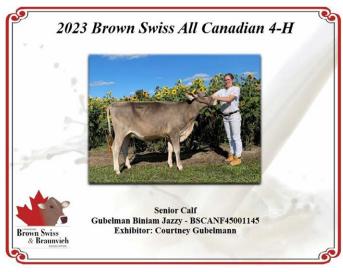

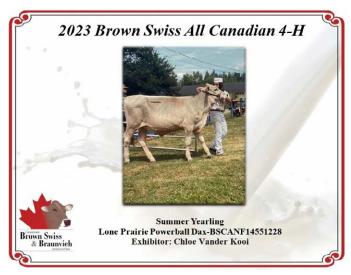

Congratulations to the 2023

All Canadian 4-H Contest Winners

2024 ALL-CANADIAN 4-H CONTEST

REMINDER - When you are in the show ring this season, take a side profile photo of your calf, so at the end of the year you can enter the All Canadian Brown Swiss 4H competition.

PICTURES:

It shall be the responsibility of the exhibitor to secure and supply the photos of animals being entered in the All-Canadian Contest.

The photos must be 5×7 unretouched black and white or color glossy prints.

Pictures must be made during the current year and show the animal in the same stage of growth as when she qualified in the show ring.

The judges will have the authority to remove pictures from the contest if picture quality standards have not been met.

CLASSES FOR THE 2024 4-H CONTEST INCLUDE:

Brown Swiss Junior Class:

- 1. Junior Calf-Mar 1/24 May 31/24
- 2. Intermediate Calf Dec 1/23 Feb 28/24

Brown Swiss Senior Class:

- 3. Senior Calf Sept 1/23 Nov 30/23
- 4. Summer Yearling June1/23 Aug 31/23
- 5. Junior Yearling Mar 1/23– May 31/23

Applications can be found at www.brownswiss.com (Click on Information and Awards, News & Events)

Sylvie Schimann's 4-H Story

Hello! My name is Sylvie Schimann. I am 12 years old and live in Prince George, British Columbia, Canada. I am also a member of the Prince George Northwest 4-H club.

My steer Bart, was born on March 15, 2022 on the Double H Ranch owned by local breeders Tom Houchen and Joanne Hawkins. Bart is a pure Braunvieh steer. He was my first steer project and I really enjoyed working with him. Bart was friendly, quite easy to train on a halter, and fairly adaptable to new things. He finished at 1,320 pounds and showed very well at the Fair. We placed First Row in Market Class and Junior Showmanship. With a respectable 3.6 pounds per day gained between April 16, 2023 and August 16, 2023, Bart placed third in the Highest Rate of Gain Award. To top it off, his carcass scored a AAA grade with a 58% lean yield. I am really proud of our results! I would highly recommend Braunvieh's for a first-time cattle owner and 4-H projects!

Kelly Paxton's new book: SHH! SOPHIE'S SLEEPING!

Young readers will adore Sophie.
Sophie is a beautiful baby calf. Her mum waited and waited for Sophie to be born and was so excited when Sophie finally arrived. Sophie's mum takes such good care of Sophie and loves her dearly. Sophie loves her mum but Sophie likes to stay awake to be with her mum as much as possible. Finally, when Sophie falls asleep her mum always says, "SHHH Sophie's Sleeping!"

Paperback available on Amazon.ca

Greetings To Everyone from Alberta

Hello Everyone,

Life has been good – I can truly say that we have the best of two worlds. How so, you wonder?

The start of it all was in 2006, we had a young girl from Germany (Michaela) live a half year on the farm with us. She loved our docile herd and spent hours helping us with the cattle, saying that Braunvieh were the most beautiful cows of all. After travelling around, gaining a variety of experiences in different farming operations and going back to school in Germany for a couple of years, Michaela returned to Canada. She married a Buffalo farmer and they now have two young boys (5-year old Luke and 2-year old Tommy).

We always kept in touch with each other and visited often. She even asked me to be her bridesmaid at the wedding. Good grief, I thought, before reluctantly accepting. My vision was to be recorded in the Guinness Book of Records as "the oldest bridesmaid ever". I just hoped that I wouldn't foul up the speech I was expected to give (it went well to my relief).

Just after the second boy was born Michaela and family came for another visit and during this visit she mentioned that she would like to buy some Braunvieh cows, she wanted to start a herd.

This was at a time when we had tried for years to choose the right successor for our farm and animals – someone interested in maintaining the Original Braunvieh herd we had built. We had advertised through "Young Agrarians" and "Farmlink", talked to many, but hadn't yet found the right person(s) to consider a transition. So, we put two and two together and thought "how about Michaela taking over the herd with us as partners?". We made some plans and ever since we have the best of two worlds.

The first world – We didn't "lose" our beloved Braunvieh. We gained a great partner that is doing a great job and keeping us entertained with all sorts of cattle tales and pictures of new born calves. Michaela and her husband Albert are interested in learning and they are all for maintaining the Original Braunvieh breed. The first year, Michaela calved out two thirds of our cows and we did the rest. This year, she took on the entire calving and Albert does the feeding and bedding. We go help here and there, but the brunt of the work is being done by them and we are welcome to go visit the cows at any time. I do miss them, however, most of them will return here to our farm for summer grazing.

The second world – We are free to do things we didn't have time to do before. We didn't want to fully retire and do nothing at all. Oh no, no farmer is made that way! You all know that feeling – one wants to be useful. So, we are still keeping very busy. We still winter the bulls, a few heifer calves and some feeder steers at our place, but no more getting up during the nights to check on cows. I also still do the record keeping, while teaching Michaela. Promotion and decision on sales and such we do together for now.

It is perfect, both calving seasons Michaela did a great job. All the babies are healthy and vigorous and she has only a couple of old straggler cows left to calf for the year.

Farmfair International – In my last newsletter I mentioned that we were again going to Farmfair. Bringing cattle there in 2023 was our 26th time. We haven't missed a year since we started in 1997 (except the year 2020, when Covid shut everything down). We hope with the help of our partners we will be able to make it up to 30 times – if we

stay healthy, that is. Getting older does set some limits.

Anyways, regarding the 2023 show, Dana Vos managed to get a few comments and pictures sent prior to the printing of the last Bell. For this issue, we will submit a few more photo's that became available afterwards.

Farmfair will celebrate its 50th anniversary this year and the attendance will likely increase. Therefore, we should get entries submitted as early as possible - entries open on September 1st and close 0ctober 1st. In 2023 we had our very first show of "Braunvieh only" animals. Before that, we always showed against all other breeds that has insufficient numbers to be on their own. We would sure like to see the Braunvieh having their own show again, which means we have a minimum of three breeders and 15 animals to qualify. Last year, we had five breeders and 21 animals. Hopefully, many of you can bring in a couple of animals or more to make at least 20 head. We would appreciate you contacting us regarding this matter ASAP because we have to confirm to the Committee that we will have enough participants for our own show. They would like to know by end of June, or sooner.

The 2024 Annual General Meeting on January 26th was well attended and we appreciated the time of everyone that has the opportunity to participate. It was great to be able to hold it here in the West. Dana Vos did all the planning and organizing and she did an excellent job all around. Without her ideas, efforts and enthusiasm, this would never have become a reality this year.

Florian Eberl, a well-known Braunvieh breeder from the early seventies passed away January 29th, 2024 at the age of almost 95. We first met Florian at his farm in Claresholm in 1984, when we purchased two of his Original Braunvieh cows. One of them was sired by his famous bull "Bouncer" and the other was sired by a son of Bouncer and both those cows were out of imported females. These two animals were the beginning of our Original Braunvieh herd and still make great contribution to our existing herd 40 years later through Al.

Florian was born in Austria and worked in Switzerland prior to coming to Canada. More of his interesting life can be read on the Internet under Florian Josef Eberl – Zentner Funeral Homes. Florian was a well-respected man of high work ethics and integrity. He will be missed by all that knew him.

Good News

Manitoba – Patrick and David Kopec of Kopec Farms Inc., Eriksdale, are now Original Braunvieh breeders. They started out with a group of heifers and bulls. On March 4th, they texted to announce the first

Original Braunvieh calf born in Manitoba – a heifer at that and a bit later, they had another heifer calf born.

Saskatchewan – Eloise Laroque from Duck Lake, will be showing an Original Braunvieh heifer in 4-H this year. Eloise visited our farm with her family in 2016, when she was only 6 years old. Says her dad "ever since that visit, she wanted to have her own Braunvieh one day". Thank you, Eloise, for your purchase and we wish you luck with your heifer in 4-H and otherwise.

Alberta – Adelynn Fetterley will attend 4-H with Lollipop – an Original Braunvieh heifer calf born at her grandpa Steve Pelkey's place near Wainwright. She showed Lollipop last year already as a baby calf in the "Cleavers" class (see previous issue of The Bell). In March this year, together with grandpa, Adelynn took Lollipop to the "Little Royal" Show at Lakeland College in Vermilion to have a "practice run" before the big 4-H event. Adelynn was the youngest participant and Lollipop was the youngest calf. We wish Adelynn a good 4-H show day.

At Chauvin, the Preston family started out with the Braunvieh focusing on A2A2 milk production. The animals they chose all tested positive for this trait.

Janice Giles of Rafter JL Ranches near Vermilion had inquired about Braunvieh a couple of years ago and last year purchased a cow/calf pair and the bull Swiss Tradition Jax, 2022 Grand Champion at Farmfair for "All Other Breed's". Janice owns a herd of Simmental cattle and several Brown Swiss cows, which she loves and wanted to try Braunvieh.

Closer to home, the McInnes family had their first Original Braunvieh calves born in the spring of 2023 – five calves from four cows (3 heifers and twin bulls). A pretty lucky start for a new breeder.

British Columbia – Last year, the Schimann girls Madeleine and Sylvie showed their Braunvieh steers Linus and Bart in the Prince George BC Northwest 4-H Club. Those two girls wrote a nice story each about their steers and sent some great photo's. Unfortunately, they missed the deadline for the last Bell, so their submissions will be shown in this issue. They did a great job. Thank you.

And this is it for now – I sure took a while with all the updates. I hope all of you are doing well and get rain, sun and good crops and calves. Don't forget to enjoy life – it goes by fast. I read someplace "let the wind blow through your hair while you still got some". So, take every opportunity to enjoy each day to the fullest, and be safe.

Verena Peden, Secretary-Manager, Alberta Braunvieh Association

News from Manitoba

Canada's Outstanding Young Farmer (OYF) program is designed to bring progressive farmers together to showcase their farms, families and achievements.

Marcus and I were honored to hear of our nomination for Manitoba 2024. We accepted then proceeded to submit the required forms and documents.

This year's program was held at the Elkhorn resort in Riding Mountain National Park. The event is family friendly so we packed up our kids and their grandparents for the weekend. We were spoiled with a gift basket, local tours, and a hospitality suit. At the Saturday night banquet, competitors, alumni, family, friends, and sponsors attended to hear last year's winners and this year's competitor's presentations. At the end of the evening it was announced that Marcus and I had won this year's Manitoba OYF!

This experience has been an opportunity for us to reflect on where our farm has come from, our current operation and our future goals. We have met many supportive OYF alumni with words of wisdom and encouragement. We look forward to showcasing our farm and our Brown Swiss as we move to Nationals in November.

Paige and Marcus Dueck, Four Oak Farms, Kleefeld, MB

If you have a young farmer to nominate visit the OYF webpage, it truly is a great program: www.oyfcanada.com/language/en/regions/manitoba/

News from Ontario

Hello to all of our Brown Swiss breeders and families and friends. It is nice once again to be in the spring months and looking forward to a productive summer season. Our Ontario Board of Directors this year is:

Chairman: Joel Voth (226)868-2528 vothvvalleyfarms@gmail.com

Vice Chairman: Bill Los cattlemaster@hotmail.com

Simon Signer (519)588-0670 simonsigner@hotmail.com

Stefan Gubelmann gubelman@tcc.on.ca

Troy McConnell troymcc@hotmail.com

Secretary/Treasurer: Tracy Reid (519)377-2812 tracyreid22@hotmail.com

The Ontario Brown Swiss Association participated in the fund-raising event, Calves For A Cause. Consignments from Canada's top herds were auctioned in this event. The Ontario Brown Swiss Association donated 100% of the proceeds of the sale of the calf and 100% of the commission to the Neonatal Intensive Care Unit at Children's Hospital, London Health Services Centre.

Jeff Stevens and the sales staff did a great job of advertising and had everything looking perfect. There was a huge crowd, the 2 Brown Swiss got lots of attention.

We wish everyone a healthy and successful summer all across Canada.

August 10, 2024

4-H Show at 12:20 p.m. | Open show at 1p.m.

Email troymcc@hotmail.com for questions and to submit your completed entry forms.

Early sign up preferred however show day entries permitted, please bring your registration papers!

News from Quebec

Greetings everyone,

I hope your spring chores are well underway! The weather has been very different from one region to another since the beginning of May. Some of us are experiencing rain on a daily basis, while others are hoping for it. Mother Nature will surely give us the opportunity to get our work done, as she does every year.

The Board of Directors welcomed Jessica Veilleux in recent months. She assumed the position that was left vacant following the Annual General Meeting held at the end of 2023. Another great team for this year. Thank you to each and every one of you for your commitment to our beautiful breed. We have been working on the Club's strategic plan for some time now. Through the member survey, we were able to identify the strong points that producers wish to emphasize. The final version of this new Strategic Plan will be available in the coming months.

The Quebec Brown Swiss Club Picnic will be held this summer. We hope to see you on July 27th in the beautiful region of Trois-Rivières, where M.C.F. Leclerc Farm has agreed to host us. A busy day is already in store more details will follow in the coming weeks. All those who prepare these activities put a lot of effort and work into ensuring that everyone has a good time. It's an event not to be missed, and we're looking forward to making it a success again this year. Looking forward to meeting you there!

Our Brown Swiss Cup is back this year, and will take place in August. A few changes will be made to the way animals are entered, but the objective of the competition itself remains the same. Watch our ads and newsletters for more details.

Lately, we have been discussing a collaborative project with Jersey Québec. At the time of writing, the project is still in the embryonic stage, but should soon be completed. It will be about promoting our breed in a slightly different way.

In closing, I'm sure you have also noticed that the number of dairy farms has been declining much more rapidly over the past year. The current situation is precarious for many, and keeping our heads above water requires even more work, resilience and determination. Let's continue to work together for our agricultural sector, so that it emerges even stronger

Don't forget to take care of yourself, even if you are doing the most beautiful job there is... without you, nothing is possible, but with you, everything is possible.

Have a great summer!

Polled or Hornless Animals

Submitted by: Serge Bilodeau, Technical Advisor

In recent years, breeders have become increasingly interested in polled (hornless) animals. The question on everyone's mind is why this dominant gene is so rare in the population. This is because, until recently, no economic value (\$\$) was really attached to this gene, as breeders dehorned their animals themselves. Moreover, in the past, the PP or Pp gene was a limiting factor for bulls. Consequently, the current enthusiasm for polled bulls is driven by animal welfare standards and genetic progress in the breed. This short article will hopefully help our readers understand the issue a little more clearly.

The first thing to remember is that every animal has a pair of genes (two) in its genetic code that determine whether or not it will have horns. At conception, a calf inherits a gene for this trait from each of its parents. It is also important to know that the "polled" gene (P) dominates the "horned" gene (p). Based on these statements, we then have three possible genetic combinations:

1. The animal receives two "polled" genes (PP) from its parents

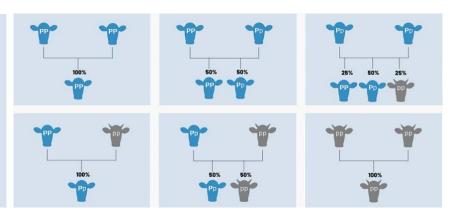

The animal will be polled and considered "homozygous" because it has two identical genes for this trait. Since these are two dominant genes, this animal will only produce polled calves, no matter what type of animal it is mated with.

2. The animal receives the "polled" gene (PP) from one of its parents and the "horned" gene (Pp) from the other The animal will itself be polled since (P) dominates (p). It will be referred to as "heterozygous polled" because it carries two different genes. It will produce no more than 50% of polled calves, assuming it is mated only with horned animals (see table).

3. The animal receives two "horned" genes (pp) from its parents

This is the only combination that will produce only horned cattle since the dominant polled gene is not present.

To get a better idea, let's look at the six different possibilities in the following table:

We now understand why it is so important for breeders wishing to obtain polled calves to know the difference between the words homozygous (PP) and heterozygous (Pp).

Here is a list of polled bulls currently available in Canada:

		LPI

Registrar Message

Hello everyone, I hope you're all doing well!

It's been a year since I have been in my new position here with the Association and it's been a great year at that. I appreciate your patience as I continue to learn the ropes! It has truly been a pleasure getting to know you all a bit better and hearing your stories, I am constantly feeling the passion you have for the Brown Swiss/ Braunvieh breed.

I want to give a quick update from the Registrar's office to let you know how it's going so far this year...

As of writing this mid-May, we have had **13 new members**, **604 registrations** and **330 classifications**. We are seeing momentum with registrations being up compared to the same period in 2023, however classifications are slightly low. The year is still young and we have time to get these numbers up!

If you have any questions or concerns please do not hesitate to contact me by email at ipassaretti@holstein.ca or by phone 1(855) 756-8300 ext. 223.

If I happen to be away, Golda-Anne Nabila will be more than happy to assist you (gnabila@holstein.ca/ext.249).

Wishing you all a great summer and don't forget to take a break once in a while.

- Isabelle Passaretti

Reporting "Polled"

If your animal is born "polled" remember to check off on the polled "yes/no" on the registration form. The Registrar's office will validate parentage to ensure the animal qualifies. The animal will then be registered with a "P" at the end of their name.

If you are interested in testing your animal(s) for the polled gene, please contact Brown Swiss by phone 1-855-756-8300 ext 277 or by email: **BrownSwiss@holstein.ca**

Spring has arrived in Saskatchewan with an abundance of seasonal anticipation. Sadly, parts of our province will continue to experience drought conditions but Whitesand Creek Farm located near Yorkton in the east central region is off to a promising start after some heavy snowfall at the beginning of March.

Calving season commenced with the arrival of the first Original Braunvieh calves who seemed to land on their feet only to drain their mothers' udders with the suction of a Dyson within their very first hour! That is the Braunvieh way, and although we have seen it with our own eyes for several years now we continue to be awestruck with this dual-purpose breed (meat and milk).

The winter's work was to establish the next level of our strategic business plan for our Original Braunvieh herd. We have spent a few years building herd numbers with particular attention to sire/dam pairings, as well as an artificial insemination program that will continue. It takes a fair amount of patience to watch the heifers and bulls fill out to see the rewards of thoughtful breeding plans. With the help of many expert resources from within and beyond our province, we have achieved a herd health protocol that yields the desired performance outcomes. We would never say the work is completed since there is always something to learn as technologies advance. Improvement is an ongoing process. But, enduring the harsh prairie winds, the frigid blizzards, and the heat of some very dry summers, we keep our mind's eye on our vision of a healthy, productive herd of one of the most precious cattle breeds, Original Braunvieh.

It is with much excitement that we see an interest in Original Braunvieh cattle growing

across the western prairies as well as further east. We hope that by working together with like-minded producers, we can collectively preserve and expand the breed in Canada. We accept every opportunity to work with commercial producers of other cattle breeds to explore the benefits of Braunvieh genetics into their programs as well. If it is to be, it is up to us.

We are always open to visitors. We enjoy sharing the Braunvieh experience with other producers. We often have stock for sale. A key aspect of our business model comes with the offer of a lasting relationship towards mutual success in upholding the integrity and appeal of this ancient breed – easy handling, affectionate, feed efficient, superior carcass quality, milk production, longevity and productivity. Follow our page on Facebook at Whitesand Creek Farm.

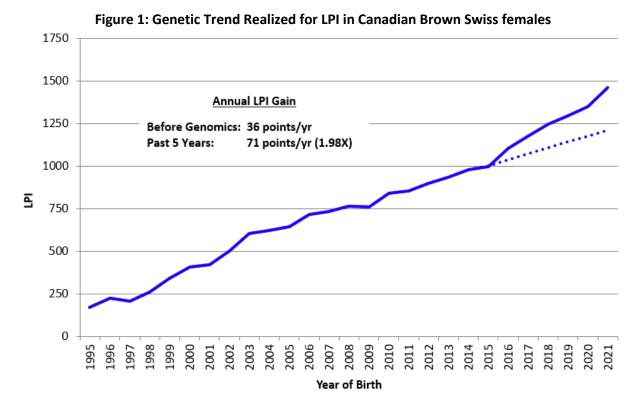

How to Maximize Genetic Progress in Your Herd

When it comes to reaching your herd goals, selecting which animals as parents of the next generation in your herd is arguably one of the most important decisions. With so much valuable information available today, what are the key areas to focus on to maximize your herd's genetic potential and reach your goals faster?

Achieving Genetic Progress

The rate of genetic gain per year in the Canadian Brown Swiss population continues to improve year over year, as illustrated in Figure 1 for the national selection index, LPI.

Genetic Gain = Genetic Variation x Intensity x Accuracy Generation Interval

This progress in genetic improvement is dependent on four key factors including genetic variation, selection intensity, accuracy of selection and generation interval. Let's dive into each of these areas further:

Genetic Variation: The genetic variability of a trait. Without some level of genetic variation there would be no differences between animals and therefore no opportunity for genetic selection. The genetic variation of a trait does not change significantly over time and is therefore not a significant factor affecting the genetic gain realized in your herd compared to others.

Selection Intensity: How many animals you choose to breed the next generation and how genetically superior they are. You'll make faster progress if you select only the highest ranked sires and mate them to the highest genetic females in your herd to produce the next generation of heifers for your herd.

Accuracy of Selection: This is reflected by the level of Reliability of the genetic evaluations used to make selection and mating decisions, which can vary depending on the trait heritability, inclusion of genomics, and the amount of performance and pedigree data available.

Generation Interval: The average age of selected parents when their offspring are born.

Dairy farmers can maximize the rate of genetic progress in their herd when selection intensity and accuracy are high while the generation interval is as low as possible.

Four Pathways to Selection

To put this in practice in the context of dairy cattle breeding we need to consider the four distinct pathways to selection illustrated in Figure 2. These include the selection of (1) sires to breed bulls, (2) dams to breed bulls, (3) sires to breed cows, and (4) dams to breed cows. The formula for genetic gain outlined above can be calculated within each of these four pathways and then summed to determine the total genetic progress per year within a dairy population, or within a specific herd.

Four Pathways to Selection

Sires to breed BULLS

Dams to breed BULLS

Sires to breed COWS

3

4

Figure 2: The Four Pathways to Dairy Cattle Selection

Pathways 1 and 2, which relate to the selection of sires and dams to breed bulls, are mainly used by Al companies and breeders that are selling bulls. For this article, we will focus on pathways 3 and 4, since they relate to the selection of sires and dams to breed cows. After all, deciding which sires to use and dams to breed to create replacements has a big impact on maximizing the rate of genetic progress within your herd and the Brown Swiss breed. As outlined previously, the two main factors that drive faster genetic gain are maximizing the accuracy and intensity of selection.

Maximizing the Accuracy of Selection

Genotyping has the biggest influence on the accuracy of selection. The adoption of genomics in 2014 led to more accurate genomic evaluations for bulls and cows across the dairy industry and accelerated the rate of genetic change. For the Brown Swiss breed, the average LPI Reliability increases by 25 percentage points through genomic testing of heifers and young bulls. All Brown Swiss bulls offered by A.I. organizations have been genotyped and therefore have an official genomic evaluation published by Lactanet. Genotyping your cows and heifers also contributes to breed improvement and results in a more accurate ranking of your females due to the increased level of Reliability. In addition, genomic testing helps to manage genetic abnormalities in the Canadian Brown Swiss population. Genotyping also allows herd owners to test for favourable traits such as polled or milk properties that improve digestibility. Overall, the more data we have on bulls and cows, including genotypes, the more accurate animals will be ranked and thus the more genetic progress is achievable both in an individual herd and within the Brown Swiss breed.

Maximizing Selection Intensity

When it comes to maximizing selection intensity, the focus is selecting the highest ranked sires and dams to produce the next generation. Developing an on-farm breeding plan for intentional selection and mating, such as Figure 3, can help you decide which reproductive strategies to use for each animal. This means either culling lower genetic merit animals or using beef semen to produce higher slaughter value crossbred calves while removing the poor genetics from your future herd. For the highest ranked females in your herd, consider using sexed semen to accelerate genetic progress. Keeping in mind this may not be the highest performing cows, it is important to look at where your animals rank from a genetic perspective. Embryo transfer (ET) is another reproductive technology used to create embryos of high genetic merit using the highest ranked sires and dams. Lower genetic merit females can then be recipients. Overall, incorporating more A.I. technologies like sexed semen and ET can lead to a large genetic change in your herd in just one generation. In general, by focusing on high genetically ranked males and females as parents of the next generation of replacement heifers also significantly reduces the generation interval, therefore further boosting the rate of genetic progress in your herd.

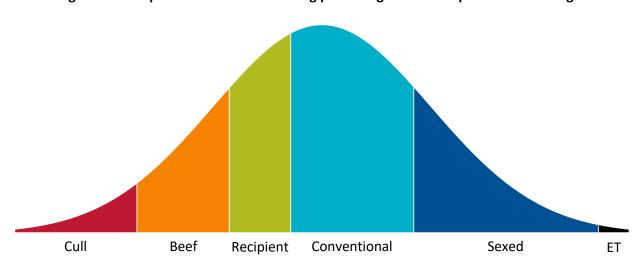

Figure 1: Example of an on-farm breeding plan using different reproductive strategies

At the end of the day, making genetic progress on your farm equates to higher producing and healthier animals for generations to come. Genetic change is controlled by several factors, but it all starts with genomic testing your heifers and cows and developing a breeding plan that incorporates more reproductive technologies using high genetic merit sires and dams as parents of the next generation.

Brown Swiss Fertility Haplotype BH14

The dairy industry has reaped substantial benefits from genomics, including advancements ranging from rapid genetic improvements for essentially all traits to the identification and management of undesirable genetic conditions and haplotypes. The latest discovery of these includes the Brown Swiss Fertility Haplotype BH14. Lactanet has been publishing Carrier Probability values for the BH14 haplotype since April 2024.

First reported in Switzerland in 2022, the BH14 haplotype causes early pregnancy loss and traces back to Ventures Esp Babaray, born in 1978, as the oldest known carrier. In the April 2023 genetic evaluation release in the United States, the Council on Dairy Cattle Breeding (CDCB) began reporting BH14 results. To reflect the likelihood that an animal carries BH14, Lactanet calculates a Carrier Probability value for every animal in its database based on known gene test results, the haplotype results received from CDCB, and pedigree data. Like other Carrier Probability values, those for BH14 are reported as values ranging from 1%, meaning the animal is likely free of the undesirable gene, to 99% meaning the animal is likely a carrier. The BH14 status for all animals can be found on the Lactanet website using the Animal Query tool. Once you have a found the animal of interest you can go to their "Genetic Evaluation Summary" page to find a pop-up box with Carrier Probability values for BH14 along with BH2. Alternatively, navigate to the animal's "Pedigree" page to access Carrier Probability values for the animal as well as its parents and grandparents.

The illustration below shows the trend in estimated average carrier probability for both Brown Swiss haplotypes, namely BH14 as well as BH2, which causes early embryonic loss or stillbirth. The average carrier frequency for BH14 has fluctuated for the last several years but is almost 9% for Canadian females born in 2023. To date, Brown Swiss breeders have effectively decreased the frequency of BH2 and should apply the same approach to continue reducing this trend along with BH14.

Managing BH14

Now that BH14 in Brown Swiss is known and reported, industry strategies can be used to reduce the occurrence that carrier animals are mated together, effectively lowering the frequency of the causative undesirable gene in the breed population. Lactanet now publishes Carrier Probability values for BH14 to assist in mating decisions. Carrier animals do not directly cause a problem in the population. However, if such carrier females are mated with a carrier bull, then 25% of the resulting pregnancies or offspring will be affected. It is important to closely monitor Carrier Probability values before making mating decisions to effectively reduce the frequency within your herd and the Brown Swiss breed.

The Lactanet website is an excellent resource to help manage known undesirable genetic conditions and haplotypes and make better breeding decisions. A pop-up box was recently added to each animal's Genetic Evaluation Summary, Inbreeding Calculator and Pedigree pages to view their Carrier Probability values for the main genetic conditions and haplotypes. The Inbreeding Calculator also contains new visuals to assist producers in identifying potential matings that have a risk of producing a pregnancy or calf affected by these undesirable genes. Together, the dairy industry can continue to identify and manage undesirable genes, leading to improved herd reproduction, health, and welfare, which translate to increased profitability.

VOS BRAUNVIEH

This is "Pearl", she is a guard donkey that lives with and protects the cows on pasture. She is also a photo bomber!

Dam: Maranatha Elisita ANN 10E | Calf: VOS MARIO DKV 11M

Life is always busy on the farm and ranch. The Braunviehs started calving this year on April 15th, and it's been a busy spring. Starting out with bull calves, it's looking like a year for bulls, as only twenty-five percent of the Braunvieh calves born so far are heifers.

We also have Nubian Goats and while they were supposed to start kidding after May 1st, there are 12 kids here and needing love too! Thank goodness the Tamworth and Berkshire Mommas will farrow near the end of May.

We raise our children fully immersed in agriculture and the life on the farm and ranch. Four of our children (Taylor, Riley, Bobbie and Harlie) will be showing heifers and their two-year-old cow-calf projects at the Cowtown 4-H Club Achievement Day in July.

They showed their heifers at Farmfair in November at Edmonton. Their names are: Lauren, Lizzy, Love and Lady. The kids also showed their cows at Farmfair as bred heifers. Kally, Katina, and Karralina have calved and they are all bulls. Karma has not calved yet and everyone hopes she has a heifer.

With Farmfair celebrating the 50th Anniversary this year, we hope to take some cattle to the show. We hope to see other breeders with Purebred Braunvieh cattle come to the show as well.

Our hope is for much needed moisture and rain for this year and a blessed summer! We look forward to summer and no more school lunches and more life on the farm and ranch.

– Dana Vos
